Experience

Spin Interactive 2017
WEB DEVELOPER INTERNSHIP (3 MONTH)

I worked on the development of an internet platform made for professional insertion -Les Bons Profils-. We built this platform using Symfony. The work was complex because the site included 2 accesses (HR access and candidate access). A matching algorithm was intended to match job offers and compatible candidates for more efficiency.

Projects Since 2017
DEVELOPER FRONT & BACK

- **My Movie Desktop (Electron / Vue.js / Symfony)**
  My Movie Desktop is a nice little app that lets you personalise your Mac with gorgeous hand-picked movie screenshots. Discover or rediscover classic and unknown treasures while finding wallpapers for your desktop.
- **Kygo unofficial website**
  This website is a school project and it was built using wordpress with a custom theme. The goal was to promote the artist and create a hub for its community.

Education

Economics and social « baccalauréat » (with honours)	2015
3rd year student at HETIC for the 5 year formation « Grande École »	2015 - 2020
